Under the Paperwork Reduction Act of 1995, no persons are required to respond to a collection of information unless it displays a valid OMB control number.

TRANSMITTAL LETTER TO THE UNITED STATES DESIGNATED/ELECTED OFFICE (DO/EO/US)

ATTORNEY'S DOCKET NUMBER 7875-012

U.S. APPLICATION NO.4H Known see 37 CFR 1.5) **CONCERNING A SUBMISSION UNDER 35 U.S.C. 371** INTERNATIONAL APPLICATION NO. PCT/EP2004/053158 INTERNATIONAL FILING DATE PRIORITY DATE CLAIMED 29 November 2004 28 November TITLE OF INVENTION A METHOD FOR PRODUCING A REPLICATION MASTER, REPLICATION METHOD AND REPLICATION MASTER APPLICANT(S) FOR DO/EO/US Peter HOGHOJ: Ralf SIEBRECHT: Sergio RODRIGUES Applicant herewith submits to the United States Designated/Elected Office (DO/EO/US) the following items and other information: X This is a FIRST-submission of items concerning a submission under 35 U.S.C. 371. This is a SECOND or SUBSEQUENT submission of items concerning a submission under 35 U.S.C. 371. This is an express request to begin national examination procedures (35 U.S.C. 371(f)). The submission must include items (5), (6), (9) and (21) indicated below. The US has been elected (Article 31). X A copy of the International Application as filed (35 U.S.C. 371(c)(2)) is attached hereto (required only if not communicated by the International Bureau). has been communicated by the International Bureau. is not required, as the application was filed in the United States Receiving Office (RO/US). An English language translation of the International Application as filed (35 U.S.C. 371(c)(2)). is attached hereto. has been previously submitted under 35 U.S.C. 154(d)(4). 7. X Amendments to the claims of the International Application under PCT Article 19 (35 U.S.C. 371(c)(3)) are attached hereto (required only if not communicated by the International Bureau). have been communicated by the International Bureau. have not been made; however, the time limit for making such amendments has NOT expired. have not been made and will not be made. An English language translation of the amendments to the claims under PCT Article 19 (35 U.S.C. 371(c)(3)). X An oath or declaration of the inventor(s) (35 U.S.C. 371(c)(4)). An English language translation of the annexes of the International Preliminary Examination Report under PCT 10. Article 36 (35 U.S.C. 371(c)(5)). Items 11 to 20 below concern document(s) or information included: 11. X An Information Disclosure Statement under 37 CFR 1.97 and 1.98. 12. F An assignment document for recording. A separate cover sheet in compliance with 37 CFR 3.28 and 3.31 is included. 13. X A preliminary amendment (Please enter the attached preliminary amendment before calculating fees) An Application Data Sheet under 37 CFR 1.76. A substitute specification. 16. l A power of attorney and/or change of address letter. A computer-readable form of the sequence listing in accordance with PCT Rule 13ter.2 and 37 CFR 1.821- 1.825. A second copy of the published International Application under 35 U.S.C. 154(d)(4). 19. L A second copy of the English language translation of the international application under 35 U.S.C. 154(d)(4).

This collection of information is required by 37 CFR 1.414 and 1.491-1.492. The information is required to obtain or retain a benefit by the public, which is to file (and by the USPTO to process) an application. Confidentiality is governed by 35 U.S.C. 122 and 37 CFR 1.11 and 1.14. This collection is estimated to take 15 minutes to complete, including gathering information, preparing, and submitting the completed form to the USPTO. Time will vary depending upon the individual case. Any comments on the amount of time you require to complete this form and/or suggestions for reducing this burden, should be sent to the Chief Information Officer, U.S. Patent and Trademark Office, U.S. Department of Commerce, P.O. Box 1450, Alexandria, VA 22313-1450. DO NOT SEND FEES OR COMPLETED FORMS TO THIS ADDRESS. SEND TO: Mail Stop PCT, Commissioner for Patents, P.O. Box 1450, Alexandria, VA 22313-1450. Page 1 of 3

Transmittal Letter

Enclosed for filing regarding the above-referenced International Application are the following:

- ☐ Transmittal letter to U.S. Designated Office (DO/EO/US) concerning filing Under 35 U.S.C. 371 (PTO-1390)
- Published PCT Application, WO 2005/051626 A1, specification (20 pgs.), 21 claims (4 pgs.); drawings (4 sheets), Search Report (3 pages); Remarks in Response to Search Report (3 pgs)
- ☐ Information Disclosure Statement with Form PTO 1449 and cited references
- Applicant claims small entity status (see 37 CFR 1.27)
- PTO Form 2038 authorizing credit card payment of \$905.00 for filing, examination, search fees, and extra claims for a small entity

June 8, 2005

European Patent Application No. EP 03354086.5 "A method for producing a replication master, ..." XENOCS SA
Our File: XEN 011 EP GR/MR

In response to the notification of April 20, 2005:

The applicant requests examination of his European patent application and designates all contracting states. The corresponding fees are paid by collective remittance.

Furthermore the applicant submits a PACE request with the enclosed separate form.

In order to facilitate examination the applicant would kindly like to comment on the extended European search report of June 24, 2004, as follows:

a) As it has already been pointed out in the applicant's letter to the EPO dated July 21, 2004, the lack of unity objections raised by the Search Division are not justified. It is therefore kindly requested to refund the additional search fees which have been paid. Patentanwäite European Patent Attorneys European Trademark Attorneys European Design Attorneys

b) As to the "X" classification of document US 4690370 A (D1) and the corresponding novelty objection raised by the EPO in section 2.1 of the extended European Search Report, the applicant kindly wishes to contradict this analysis as follows:

The characterising part of independent claim 1 reads:

"characterised in that said method comprises the step of coating at least a part of said master with a **smoothening** layer"

As defined on page 3, line 4 of the originally filed description,

"this smoothening layer is a layer which due to a certain flowability of its material displays a smaller roughness at its top surface than the surface on which it has been grown, in contrast to for example ordinary metallic monolayers ..."

Taking this definition of a smoothening layer into consideration it will be seen that document D1 does not disclose a **smoothening** layer, but instead only discloses a smooth layer which is grown on top of a smooth surface. Document D1 does therefore not disclose the features of the characterising part of claim 1. In detail:

Document D1 teaches to provide a surface coating 34 on a surface portion 32 of a mold 24. This surface coating may be provided by sputtering (see for example column 2, line 16).

Document D1 repeatedly emphasises that the roughness on top of the surface coating 34 is exactly identical to the roughness of the surface portion 32 on which it has been grown, see for example column 1, line 57 to 65, column 2, first paragraph, column 2, lines 13 - 19, column 4, lines 20 - 31 as well as claims 1 and 4 of D1. All of these passages repeatedly point out that the surface

10/577522

IAP20 R03'07 GTTTTO 27 APR 2006

roughness values of the surface portion 32 and its surface coating 34 on top are absolutely identical, amounting to 12.5×10^{-8} meters RMS.

In particular the passage in column 4, lines 26 – 31 makes clear that this surface roughness value of the "substrate" is obtained

"by smoothing the surface portion 32 of the mold 24 until it has a roughness of no more than about 12.5×10^{-8} meters RMS".

When this roughness value is obtained, the surface coating 34 is grown on the surface portion by sputtering. The final surface roughness, however, is not at all changed by the provision of the surface coating.

In other words, the surface coating 34 proposed in D1 is smooth (at least in the sense of D1) because it is grown on a smooth substrate, but it does not at all actively help to improve the surface roughness value of the mold.

This provision of this **smooth** layer on a smooth substrate has nothing to do with the idea to provide a **smoothening** layer which actively contributes to improving the surface roughness of a replication master according to the invention.

Only as a side remark the applicant would kindly like to point out that prior art document D2 which has also briefly been discussed in the extended European search report does not give the slightest hint as to such a smoothening layer, either.

Dr. René Günther
